Abstract

We study and the fraction with 50% accuracy & more. The method is evaluated on two datasets and compared with earlier work in detail.

Keywords: physics; math.

Introduction

Intro text with a citation (Smith et al., 2020) and a narrative citation Brown and Lee (2019), a URL https://example.com/test_page and an e-mail info@example.org. See Table 1 and Figure 1.

Methods subsection

- first bullet with
- second bullet

1. numbered one
2. numbered two

Table 1 Sample results

Name	Value	Error
A	1.5	0.1
B	2.5	0.2

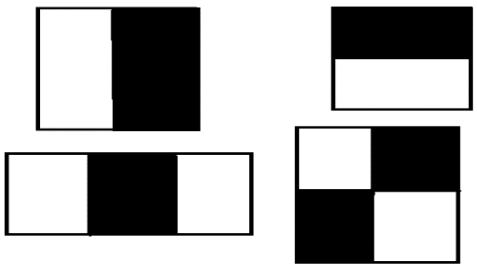

Figure 1: A figure caption with .

Conclusions

Done. The results agree with (Brown & Lee, 2019; Smith et al., 2020).

Acknowledgements

Thanks to everyone who helped with the experiments in this study.
